PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience building scalable backend systems and production-grade web applications using Django and Python. Specialized in designing modular architectures, optimizing backend performance, and delivering end-to-end systems in EdTech and HealthTech domains. Proven ability to lead teams, own product development, and deploy reliable applications in production environments.

PROFESSIONAL EXPERIENCE

Telth Healthcare Private Limited

February 2021 - April 2026

Full Stack Engineer / Tech Lead

Salem, TN, India

- Designed and built backend systems handling 11+ workflows across 5 departments, using Python
- Architected 12 modular service-layer components, cutting duplicate code by ~71% / reducing new-feature dev time by 60%
- Developed 40+ REST API endpoints powering admin panels, onboarding, and internal tools serving 200+ daily active users
- Deployed and managed 3 production applications on AWS & Vercel with 99% uptime / handling 5000+ requests per day
- Implemented RBAC authentication across 6 user roles, securing 30+ API endpoints
- Reduced operational overhead by 88% digitizing workflows like onboarding, scheduling, and reporting
- Led a cross-functional team of 5 engineers, delivering 10+ releases on schedule over 10 months

TECHNICAL SKILLS

Languages & Core: Python, JavaScript, TypeScript, Object-Oriented Programming (OOP), Data Structures

Backend & Frameworks: Django, Django REST Framework (DRF), REST API Design, Validation, Pagination, Versioning, API-Driven UI Integration

Auth & Architecture: Authentication Systems, Role-Based Access Control (RBAC), Service-Layer Architecture, Business Logic Abstraction, Modular Monolith Architecture, Scalable & Extensible Multi-Module Platform Design

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Schema Design, Indexing, Query Optimization, Relational & Semi-Structured Data Management

Frontend & Integration: React.js, HTML, CSS, Bootstrap, Tailwind CSS

DevOps & Deployment: AWS (EC2), Vercel, Docker, Google Cloud Platform, Domain Management, DNS Configuration, Email Setup, Environment-Based Configuration

Leadership & Process: Team Leadership, Cross-Functional Team Management, Agile, Product Development, Production Deployment, Operations Management, Technical Documentation, Workflow Design & Automation

KEY PROJECTS

NATLIFE PLATFORM (SCALABLE DJANGO BACKEND SYSTEM)

- Built a modular multi-app backend system using Django and DRF
- Implemented service-layer architecture for clean separation of business logic
- Designed REST APIs with validation, serializers, and reusable components
- Developed custom authentication system with role-based permissions

ONLINE UNIVERSITY ADMIN PLATFORM - <https://cucom.campushubedu.com/institute/>

- Built an end-to-end admin system managing student lifecycle and academic workflows
- Enabled centralized control for faculty, students, and operations

HEALTHCARE WORKER ONBOARDING PLATFORM - <https://app.telth.care/>

- Developed backend system for onboarding and managing healthcare professionals
- Designed scalable architecture for handling workflow-based processes
- Automated onboarding for 50+ healthcare workers over 1 year, cutting the time from 5 days to under 1 day

CERTIFICATIONS: Python Essentials 2 – Cisco Networking Academy
